

# TOWELS

We specialize in hotel towels, institutional towels & SPA towels. Bath towels are either 100% cotton or a cotton/polyester blend, usually 85% cotton, 15% polyester. They are complemented with hand towels and face cloths. These towels are available in many varieties, sizes and colors. Bath towels and hand towels made of the blend of cotton and polyester are more durable than just plain cotton towels and will last longer than just plain cotton. However, cotton towels have a higher absorbency than the blended towels. We also have a supply of Beach towels which are also made from the same compositions.

You'll find below, a complete line of towels we supply.
